

SERO EMS Group expands capabilities with EPSa-Elektronik & Präzisionsbau Saalfeld as a new member

Rohrbach, Germany – 11th of November 2024 – SERO EMS Group, a leading provider of Electronics Manufacturing Services (EMS), is pleased to announce EPSa-Elektronik & Präzisionsbau Saalfeld GmbH and EPSa Děčín s.r.o. (together “EPSa”), a well-established development and manufacturing company joining the group’s portfolio, which also includes Solid Semecs BV, SERO GmbH, and Synchron EMS.

With this addition, SERO EMS Group significantly strengthens its development capabilities, enhancing its expertise in software and hardware development, mechanical engineering, rapid prototyping, and high-mix, low-volume production. EPSa’s specialized skill set will enhance SERO EMS Group’s ability to even better serve complex customer needs and offer tailored solutions with a focus on MedTech equipment and high-end industrial applications.

“EPSa is a fantastic addition to the SERO EMS family,” said Jan-Frederik Kalee, CEO of SERO EMS Group. “Their technical capabilities and commitment to quality align perfectly with our strategic goals. Together, we are positioned to offer enhanced, end-to-end solutions that meet the growing complexity of customer demands across industries.”

“We as EPSa are excited about the synergies and high cultural fit with the group. It will allow us to develop more differentiating value-add services towards existing and new customers. Taking over the responsibility for the group CTO role is an honor and motivation emphasizing the strong level of integration between the group companies. Looking forward to joining and growing a superior SERO EMS Group team” said Ali Sahin, MD EPSa.

As SERO EMS Group continues its focus on top-line growth, profitability, and cost control, EPSa’s expertise will be integral to its efforts to innovate and deliver high-quality, customized solutions to a diverse client base.
